#### Abstract

In response to a growing concern about hate crimes, the United States Congress enacted the Hate Crime Statistics Act of 1990. The Act requires the attorney general to establish guidelines and collect, as part of the Uniform Crime Reporting (UCR) Program, data "about crimes that manifest evidence of prejudice based on race, religion, sexual orientation, or ethnicity, including where appropriate the crimes of murder and non-negligent manslaughter, forcible rape, aggravated assault, simple assault, intimidation, arson, and destruction, damage or vandalism of property." Hate crime data collection was required by the Act to begin in calendar year 1990 and to continue for four successive years. In September 1994, the Violent Crime Control and Law Enforcement Act amended the Hate Crime Statistics Act to add disabilities, both physical and mental, as factors that could be considered a basis for hate crimes. Although the Act originally mandated data collection for five years, the Church Arson Prevention Act of 1996 amended the collection duration "for each calendar year," making hate crime statistics a permanent addition to the UCR program. As with the other UCR data, law enforcement agencies contribute reports either directly or through their state reporting programs. Information contained in the data includes number of victims and offenders involved in each hate crime incident, type of victims, bias motivation, offense type, and location type.

#### Summary Data Description

Time Period: January 1, 2004 - December 31, 2004  
Date(s) of Collection: 2004

- Study 23544 -

Country:	United States
Geographic Unit:	State, county, and jurisdiction
Unit of Analysis:	Crime incident
Universe:	Hate crime incidents reported by law enforcement agencies in the United States.
Kind of Data:	Event/transaction data

### Methodology and Processing

#### Data Collection Methodology

Data Collector:	U.S. Dept. of Justice, Federal Bureau of Investigation.
Mode of Data Collection:	Self-enumerated questionnaire
Type of Research Instrument:	Structured questionnaire

### Data Access

#### Dataset Availability

Location:	Inter-university Consortium for Political and Social Research
Extent of Collection:	2 data files + machine-readable documentation + SAS, SPSS, and Stata setup files

## Data Files Description

### File-by-File Description

File Name:	Batch Header File
Contents of Files:	The Batch Header file contains agency-level information. ICPSR added the variable HC_FLAG to indicate whether any hate crime incidents are included in the Hate Crime Incident-Record File.
File Dimensions:	<ul style="list-style-type: none"><li>• No. of Cases: 20,585</li><li>• No. of Variables: 54</li><li>• Record Length: 283</li><li>• Records per Case: 1</li><li>• Overall No. of Records: 20,585</li></ul>
Type of File:	ASCII
Data Format:	Logical record length
Extent of Processing Checks:	ICPSR performed checks for undocumented codes, reformatted the data and documentation, and prepared SAS, SPSS, and Stata setup files and SAS transport, SPSS system, and Stata system files. ICPSR did not recode blanks or system missing data to standardized values. Users should note that blanks and missing data may have a substantive meaning under the FBI coding scheme.
Missing Data:	Missing data codes are not defined.

### Notes

#### FILE STRUCTURE

The Hate Crime dataset is received from the FBI as one data file with a hierarchical structure. There are two record types. Each police agency is represented by a single batch header (BH) record. For each police agency in the file there are zero or more incident records (IR) which follow directly after the batch header record. Incident records are linked to their corresponding batch header records by the ORI variable.

ICPSR separated the original data file and produced two rectangular data files, a Batch Header File and an Incident Record File. On the Incident Record File the Batch Header File variables were merged in for those agencies that have a hate crime incident.

## File-by-File Description

File Name:	Incident-Record File
Contents of Files:	The Hate Crime Incident-Record file contains one record for every reported hate crime. Variables from the Batch Header file are prepended to each record based on the ORI variable. Additional variables describe the characteristics of the hate crime incident.
File Dimensions:	<ul style="list-style-type: none"><li>• No. of Cases: 7,649</li><li>• No. of Variables: 179</li><li>• Record Length: 478</li><li>• Records per Case: 1</li><li>• Overall No. of Records: 7,649</li></ul>
Type of File:	ASCII
Data Format:	Logical record length
Extent of Processing Checks:	ICPSR performed checks for undocumented codes, reformatted the data and documentation, and prepared SAS, SPSS, and Stata setup files and SAS transport, SPSS system, and Stata system files. ICPSR did not recode blanks or system missing data to standardized values. Users should note that blanks and missing data may have a substantive meaning under the FBI coding scheme.
Missing Data:	Missing data codes are not defined.

 Interval: discrete  
 Text: This is the population of the agency in the previous census.

**MASTERYR MASTER FILE YEAR**

Location: 226-229 (width: 4; decimal: 0)  
 Variable Type: numeric (ISO)  
 Interval: discrete  
 Text: This is the year of the data records for the hate crime master file requested.

**QTR1ACT STATE FIRST QUARTER ACTIVITY**

Location: 230-230 (width: 1; decimal: 0)  
 Variable Type: character (ISO)

- Study 23544 -

Interval: discrete

<i>Value</i>	<i>Label</i>
Z	Zero-Report was submitted
I	Incident Report was submitted
	No hate crime information

**QTR2ACT STATE SECOND QUARTER ACTIVITY**

Location: 231-231 (width: 1; decimal: 0)

Variable Type: character (ISO)

Interval: discrete

<i>Value</i>	<i>Label</i>
Z	Zero-Report was submitted
I	Incident Report was submitted
	No hate crime information

**QTR3ACT STATE THIRD QUARTER ACTIVITY**

Location: 232-232 (width: 1; decimal: 0)

Variable Type: character (ISO)

Interval: discrete

<i>Value</i>	<i>Label</i>
Z	Zero-Report was submitted
I	Incident Report was submitted
	No hate crime information

**QTR4ACT STATE FOURTH QUARTER ACTIVITY**

Location: 233-233 (width: 1; decimal: 0)

Variable Type: character (ISO)  
Interval: discrete

<i>Value</i>	<i>Label</i>
I	Incident Report was submitted
	No hate crime information

**F3QACT** **FEDERAL THIRD QUARTER ACTIVITY**

Location: 236-236 (width: 1; decimal: 0)  
Variable Type: character (ISO)  
Interval: discrete

<i>Value</i>	<i>Label</i>
I	Incident Report was submitted
	No hate crime information

**F4QACT** **FEDERAL FOURTH QUARTER ACTIVITY**

Location: 237-237 (width: 1; decimal: 0)  
Variable Type: character (ISO)  
Interval: discrete

<i>Value</i>	<i>Label</i>
I	Incident Report was submitted
	No hate crime information

**AGNAME** **AGENCY NAME**

Location: 238-267 (width: 30; decimal: 0)  
Variable Type: character (ISO)  
Interval: discrete  
Text: This is the name of the agency.

**CFIPS1** **FIPS COUNTY CODE-1**

Location: 268-270 (width: 3; decimal: 0)  
Variable Type: character (ISO)  
Interval: discrete  
Text: This variable contains the FIPS county code corresponding to the UCR county code in variable COUNTY1  
  
Federal Information Processing Standards (FIPS) publication FIPS 55 lists FIPS county codes and names.

**CFIPS2** **FIPS COUNTY CODE-2**

Location: 271-273 (width: 3; decimal: 0)  
Variable Type: character (ISO)  
Interval: discrete  
Text: This variable contains the FIPS county code corresponding to the UCR county code in variable COUNTY1

- Study 23544 -

Federal Information Processing Standards (FIPS) publication FIPS 55 lists FIPS county codes and names.

**CFIPS3 FIPS COUNTY CODE-3**

Location: 274-276 (width: 3; decimal: 0)  
Variable Type: character (ISO)  
Interval: discrete  
Text: This variable contains the FIPS county code corresponding to the UCR county code in variable COUNTY1  
  
Federal Information Processing Standards (FIPS) publication FIPS 55 lists FIPS county codes and names.

**CFIPS4 FIPS COUNTY CODE-4**

Location: 277-279 (width: 3; decimal: 0)  
Variable Type: character (ISO)  
Interval: discrete  
Text: This variable contains the FIPS county code corresponding to the UCR county code in variable COUNTY1  
  
Federal Information Processing Standards (FIPS) publication FIPS 55 lists FIPS county codes and names.

**CFIPS5 FIPS COUNTY CODE-5**

Location: 280-282 (width: 3; decimal: 0)  
Variable Type: character (ISO)  
Interval: discrete  
Text: This variable contains the FIPS county code corresponding to the UCR county code in variable COUNTY1  
  
Federal Information Processing Standards (FIPS) publication FIPS 55 lists FIPS county codes and names.

**HC\_FLAG HATE CRIME INCIDENT PRESENT FLAG**

Location: 283-283 (width: 1; decimal: 0)  
Variable Type: numeric (ISO)  
Interval: discrete  
Text: ICPSR added this variable to indicate whether at least one hate crime record is contained in the Incident Record File.

<i>Value</i>	<i>Label</i>
0	No hate crime incident present
1	Hate crime incident present

#### BACKGROUND

##### A. Legislative Mandate to Report Hate Crimes

In response to a growing concern about hate crimes, on April 23, 1990, Congress enacted the Hate Crime Statistics Act of 1990 (hereafter The Act). The Act requires the Attorney General to establish guidelines and collect, as part of the Uniform Crime Reporting (UCR) Program, data about crimes that manifest evidence of prejudice based on race, religion, sexual orientation, or ethnicity, including where appropriate the crimes of murder and non-negligent manslaughter; forcible rape; aggravated assault, simple assault, intimidation; arson; and destruction, damage or vandalism of property. Hate crime data collection was required by The Act to begin in calendar year 1990 and continue for four succeeding years. Responsibilities of the Attorney General under The Act were delegated to the Director of the FBI. The FBI's UCR Program was assigned the task of developing the procedures for and managing the implementation of the collection of hate crime data. In September 1994, the Violent Crime Control and Law Enforcement Act amended the Hate Crime Statistics Act to add disabilities, both physical and mental, as factors that could be considered a basis for hate crimes. Although The Act originally mandated data collection for five years, the Church Arson Prevention Act of 1996 amended the collection duration for each calendar year, making hate crime statistics a permanent addition to the UCR Program. The Act, as amended, appears in Appendix I.

##### B. Developing a Collection Approach

The primary emphasis in developing an approach for collecting national hate crime statistics was to avoid placing major new reporting burdens on law enforcement agencies contributing data to the UCR Program. To accomplish this goal the following decisions were made:

1. The hate crime collection is an adjunct to the UCR collection. Hate crimes are not separate, distinct crimes, but rather traditional offenses motivated by the offender's bias. For example, an offender may commit arson because of his/her racial bias. It is, therefore, unnecessary to create a whole new crime category. To the contrary, hate crime data can be collected by merely capturing additional information about offenses already being reported to UCR.

2. The types of bias motivation to be reported are limited. There are, of course, many kinds of bias. Some of the more common kinds are those against race, religion, disability, sexual orientation, or ethnicity/national origin. But, there are also biases against rich people, poor people, men who wear long hair and/or beards, people who dress oddly, smokers, drinkers, people with diseases such as AIDS, motorcycle gangs, rock musicians, etc. The types of bias to be reported to the FBI's UCR Program are limited to those mandated by the enabling Act and its subsequent amendments, i.e., bias based on race, religion, disability, sexual orientation, or ethnicity. Because in the UCR Program, ethnicity has been limited to whether a person is or is not Hispanic, the term ethnicity/national origin was adopted to denote a broader meaning. (The definition of an ethnicity/national origin bias can be found below.) Although there were no comprehensive statistics on the incidence of hate crimes, the limited statistics gathered in existing local and state hate crime programs indicated that the number of hate crimes reported annually throughout the United States should not constitute a major reporting burden. Hate crime reporting should not, therefore, require large new commitments of personnel and other resources by local, state, and federal UCR data contributors.

## Definitions

Text:	<p>DEFINITIONS</p> <p>To ensure uniformity in reporting nationwide, the following definitions have been adopted for use in hate crime reporting:</p> <p>Bias - A preformed negative opinion or attitude toward a group of persons based on their race, religion, disability, sexual orientation, or ethnicity/national origin.</p> <p>Bias Crime - A criminal offense committed against a person or property which is motivated, in whole or in part, by the offenders bias against a race, religion, disability, sexual orientation, or ethnicity/national origin; also known as Hate Crime.</p> <p>Note: Even if the offender was mistaken in his/her perception that the victim was a member of the group he or she was acting against, the offense is still a bias crime because the offender was motivated by bias against the group.</p> <p>Bisexual - (adjective) Of or relating to persons who experience sexual attraction toward and responsiveness to both males and females; (noun) a bisexual person.</p> <p>Disability Bias - preformed negative opinion or attitude toward a group of persons based on their physical or mental impairments/challenges, whether such disability is temporary or permanent, congenital or acquired by heredity, accident, injury, advanced age, or illness.</p> <p>Disabled - (adjective) Of or relating to persons who have physical or mental impairments/ challenges, whether temporary or permanent, due to conditions that are congenital or acquired by heredity, accident, injury, advanced age, or illness; (noun) a disabled person.</p> <p>Ethnicity/National Origin Bias - preformed negative opinion or attitude toward a group of persons of the same race or national origin who share common or similar traits, languages, customs, and traditions, e.g., Arabs, Hispanics.</p> <p>Gay - (adjective) Of or relating to males who experience a sexual attraction toward and responsiveness to other males; (noun) a homosexual male.</p> <p>Hate Crime - Bias Crime.</p> <p>Hate Group - An organization whose primary purpose is to promote animosity, hostility, and malice against persons belonging to a race, religion, disability, sexual orientation, or ethnicity/national origin which differs from that of the members of the organization, e.g., the Ku Klux Klan, American Nazi Party.</p> <p>Heterosexual - (adjective) Of or relating to persons who experience a sexual attraction toward and responsiveness to members of the opposite sex; (noun) a heterosexual person.</p> <p>Homosexual - (adjective) Of or relating to persons who experience a sexual attraction toward and responsiveness to members of their own sex; (noun) a homosexual person.</p> <p>Lesbian - (adjective) Of or relating to females who experience a sexual attraction toward and responsiveness to other females; (noun) a homosexual female.</p> <p>National Incident-Based Reporting System (NIBRS) - A unit-record reporting system which is being implemented to replace the traditional UCR Summary Reporting System (SRS). NIBRS provides for expanded collection and reporting of offenses and arrests and their circumstances.</p>

Racial Bias - A preformed negative opinion or attitude toward a group of persons who possess common physical characteristics, e.g., color of skin, eyes, and/or hair; facial features; etc., genetically transmitted by descent and heredity which distinguish them as a distinct division of humankind, e.g., Asians, blacks, whites.

Religious Bias - A preformed negative opinion or attitude toward a group of persons who share the same religious beliefs regarding the origin and purpose of the universe and the existence or nonexistence of a supreme being, e.g., Catholics, Jews, Protestants, atheists.

Sexual-Orientation Bias - A preformed negative opinion or attitude toward a group of persons based on their sexual attraction toward, and responsiveness to, members of their own sex or members of the opposite sex, e.g., gays, lesbians, heterosexuals.

Summary Reporting System (SRS) - The traditional tally system which has been used since 1930 to collect UCR data.

## Criteria of Hate Crime

Text:	<p>CRITERIA OF HATE CRIME</p> <p>A. Bias Motivation</p> <p>The object of the data collection is to indicate whether the offender was motivated to commit the offense because of his/her bias against a racial, religious, disability, sexual-orientation, or ethnic/national origin group. Because of the difficulty of ascertaining the offender's subjective motivation, bias is to be reported only if investigation reveals sufficient objective facts to lead a reasonable and prudent person to conclude that the offender's actions were motivated, in whole or in part, by bias. The specific types of bias to be reported follow:</p> <p>Racial Bias:</p> <p>Anti-White</p> <p>Anti-Black</p> <p>Anti-American Indian/Alaskan Native</p> <p>Anti-Asian/Pacific Islander</p> <p>Anti-Multi-Racial Group</p> <p>Disability Bias:</p> <p>Anti-Physical Disability</p> <p>Anti-Mental Disability</p> <p>Sexual-Orientation Bias:</p> <p>Anti-Male Homosexual (Gay)</p> <p>Anti-Female Homosexual (Lesbian)</p> <p>Anti-Homosexual (Gay and Lesbian)</p> <p>Anti-Heterosexual</p> <p>Anti-Bisexual</p> <p>Religious Bias:</p> <p>Anti-Jewish</p> <p>Anti-Catholic</p> <p>Anti-Protestant</p> <p>Anti-Islamic (Moslem)</p> <p>Anti-Other Religion (Buddhism,Hinduism, Shintoism, etc.)</p> <p>Anti-Multi-Religious Group</p>

### B. Objective Evidence that the Crime was Motivated by Bias

An important distinction must be made when reporting a hate crime. The mere fact that the offender is biased against the victim's race, religion, disability, sexual orientation, and/or ethnicity/national origin does not mean that a hate crime was involved. Rather, the offender's criminal act must have been motivated, in whole or in part, by his/her bias.

Because motivation is subjective, it is difficult to know with certainty whether a crime was the result of the offender's bias. Therefore, before an incident can be reported as a hate crime, sufficient objective facts must be present to lead a reasonable and prudent person to conclude that the offender's actions were motivated, in whole or in part, by bias. While no single fact may be conclusive, facts such as the following, particularly when combined, are supportive of a finding of bias:

1. The offender and the victim were of different race, religion, disability, sexual orientation, and/or ethnicity/national origin. For example, the victim was black and the offender was white.
2. Bias-related oral comments, written statements, or gestures were made by the offender which indicate his/her bias. For example, the offender shouted a racial epithet at the victim.
3. Bias-related drawings, markings, symbols, or graffiti were left at the crime scene. For example, a swastika was painted on the door of a synagogue.
4. Certain objects, items, or things which indicate bias were used. For example, the offenders wore white sheets with hoods covering their faces or a burning cross was left in front of the victim's residence.
5. The victim is a member of a racial, religious, disability, sexual-orientation, or ethnic/national origin group which is overwhelmingly outnumbered by other residents in the neighborhood where the victim lives and the incident took place. This factor loses significance with the passage of time; i.e., it is most significant when the victim first moved into the neighborhood and becomes less and less significant as time passes without incident.
6. The victim was visiting a neighborhood where previous hate crimes were committed against other members of his/her racial, religious, disability, sexual-orientation, or ethnic/national origin group and where tensions remained high against his/her group.
7. Several incidents occurred in the same locality, at or about the same time, and the victims were all of the same race, religion, disability, sexual orientation, or ethnicity/national origin.
8. A substantial portion of the community where the crime occurred perceived that the incident was motivated by bias.
9. The victim was engaged in activities promoting his/her race, religion, disability, sexual orientation, or ethnicity/national origin. For example, the victim was a member of the NAACP or participated in gay rights demonstrations.
10. The incident coincided with a holiday or a date of particular significance relating to a race, religion, disability, sexual orientation, or ethnicity/national origin, e.g., Martin Luther King Day, Rosh Hashanah.

## - Study 23544 -

11. The offender was previously involved in a similar hate crime or is a hate group member.
12. There were indications that a hate group was involved. For example, a hate group claimed responsibility for the crime or was active in the neighborhood.
13. A historically established animosity existed between the victim's and the offender's groups.
14. The victim, although not a member of the targeted racial, religious, disability, sexual-orientation, or ethnic/national origin group, was a member of an advocacy group supporting the precepts of the victim group.

### C. Cautions

1. Need for Case-by-Case Assessment of the Facts - The aforementioned factors are not all-inclusive of the types of objective facts which evidence bias motivation. Therefore, reporting agencies must examine each case for facts which clearly provide evidence that the offender's bias motivated him/her to commit the crime.
2. Misleading Facts - Agencies must be alert to misleading facts. For example, the offender used an epithet to refer to the victim's race, but the offender and victim were of the same race.
3. Feigned Facts - Agencies must be alert to evidence left by the offenders which is meant to give the false impression that the incident was motivated by bias. For example, students of a religious school vandalize their own school, leaving anti-religious statements and symbols on its walls in the hope that they will be excused from attending class.
4. offender's Mistaken Perception - Even if the offender was mistaken in his/ her belief that the victim was a member of a racial, religious, disability, sexual-orientation, or ethnic/national origin group, the offense is still a hate crime as long as the offender was motivated by bias against that group. For example, a middle-aged, non-gay man walking by a bar frequented by gays was attacked by six teenagers who mistakenly believed the victim had left the bar and was gay. Although the offenders were wrong on both counts, the offense is a hate crime because it was motivated by the offenders' anti-gay bias.
5. Changes in Findings of Bias - If, after an initial incident report was submitted, a contrary finding regarding bias occurs, the national file must be updated with the new finding. For example, if an initial finding of no bias was later changed to racial bias or a finding of racial bias was later changed to religious bias, the change should be reported to the FBI's UCR Program.

Examples

Text:

EXAMPLES

A. While driving through a predominantly Mexican-American neighborhood, a black male stopped his car to repair a flat tire. A group of Mexican-Americans leaving a bar across the street accosted the driver and then attacked him with bottles and clubs. During the attack, the offenders called the victim by a well-known and recognized epithet used against blacks and told him that blacks were not welcome in the neighborhood. This incident would be reported as Anti-Black because the victim and offenders are of different races, the offenders used a racial epithet, and the facts reveal no other reason for the attack than the stated one, i.e., to keep blacks out of the neighborhood.

B. A white juvenile male snatched a Jewish woman's purse, and in doing so, knocked her down and called her by a well-known and recognized epithet used against Jews. The offender's identity is not known. Although the offender used an epithet for Jews, it is not known whether he belongs to another religious group or whether his motive was anything more than robbery. Because the facts are ambiguous, agencies should not report this incident as bias motivated.

C. Overnight, unknown persons broke into a synagogue and destroyed several religious objects. The perpetrators drew a large swastika on the door and wrote Death to Jews on a wall. Although valuable items were present, none were stolen. This incident should be reported as Anti-Jewish because the offenders destroyed religious objects, left anti-Semitic words and graffiti behind, and theft did not appear to be the motive for the burglary.

D. A 29-year-old Japanese-American male was attacked by a 51-year-old white male wielding a tire iron. The victim suffered severe lacerations and a broken arm. The incident took place in a parking lot next to a bar. Investigation revealed that the offender and victim had previously exchanged racial insults in the bar, the offender having initiated the exchange by calling the victim by a well-known and recognized epithet used against the Japanese and complaining that the Japanese were taking away jobs from Americans. An Anti-Asian/Pacific Islander offense would be reported based on the difference in race of the victim and offender, the exchange of racial insults, and the absence of other reasons for the attack.

E. An adult white male was approached by four white teenagers who requested money for the bus. When he refused, one of the youths said to the others, Let's teach this [epithet for a gay person] a lesson. The victim was punched in the face, knocked to the ground, kicked several times, and robbed of his wristwatch, ring, and wallet. When he reported the crime, the victim advised he did not know the offenders and that he was not gay. The facts are ambiguous. Although an epithet for a gay person was used by one of the offenders, the victim was not gay. Such epithets are sometimes used as general insults regardless of the target person's sexual orientation, and in this case the offenders' motivation appeared to be limited to obtaining money from the victim. Therefore, the incident would not be designated bias motivated.

F. A small neighborhood bar frequented by gays burned down after being closed for the night. Investigation revealed that the fire was deliberately set, but there were no witnesses or suspects. Although the fire was deliberately set, the fact that the bar was frequented by gays may have been coincidental. Therefore, the incident should not be reported as bias motivated. Two weeks later, three white adult males were arrested on a tip from an informant. They admitted burning down the bar, saying they did it to keep gays out of the neighborhood. As a result, this incident should now be reported as a bias crime.

G. Six black men assaulted and seriously injured a white man and his Asian male friend as they were walking through a residential neighborhood. Witnesses said that the victims were attacked because they were trespassing in a black neighborhood. An Anti-Multi-Racial Group bias incident should be reported because the victims and offenders were of different races, and witnesses reported that the victims were attacked because they were not black.

- Study 23544 -

H. Overnight, an auditorium which was being used by representatives of several religious denominations to hold an ecumenical conference was vandalized by unknown subjects. Extensive damage was caused and statements, such as There is but one true religion and Down with the nonbelievers, were spray painted onto the walls. An Anti-Multi-Religious Group incident should be reported because the offenders clearly evidenced their hostility against a group representing more than one religion.

I. A group home for persons with psychiatric disabilities who were in transition back into the community was the site of a reported arson. Apparently, neighbors had expressed many concerns about the group home and were angry that the house was located in their community. Shortly before the fire was reported, a witness heard a white male state, I'll get rid of those ?crazies.? I'll burn them out. An Anti-Mental Disability incident should be reported because the suspect apparently committed the crime because of his bias against persons with psychiatric disabilities.

## Submitting Hate Crime Data

Text: SUBMITTING HATE CRIME DATA TO THE FBI's UCR PROGRAM

There are two (2) formats for reporting hate crime data to the FBI's UCR Program the Quarterly Hate Crime Report and a hate crime data element for NIBRS participants.

### A. Quarterly Hate Crime Report

The Quarterly Report is to be submitted in addition to other UCR Program requirements; i.e., the offenses which are reported using the form must also be reported in accordance with the requirements of the SRS or NIBRS, depending on which system is applicable.

1. Who submits Quarterly Hate Crime Reports? - Those who submit Quarterly Hate Crime reports are (a) agencies participating in the SRS, and (b) agencies participating in NIBRS that are not ready to include the hate crime data element in their submissions.

2. How are the data transmitted? - (a) Agencies may submit hard copy forms; (b) State UCR Programs which transmit agencies' data may obtain magnetic tape specifications from the UCR Program in order to include hate crime data as part of their regular submissions, either summary or NIBRS, if the hate crime data element has not yet been incorporated; or (c) individual agencies or state UCR Programs using personal computers for the collection and storage of hate crime data may obtain floppy disk specifications from the FBI's UCR Program for the purpose of submitting data.

3. What does the Quarterly Report look like? - A sample of the form titled Quarterly Hate Crime Report is included in Appendix II. It consists of a quarterly summary report and an incident report for each bias incident.

4. What offenses are to be reported? - The form is to be used to report the following offense categories:

Murder and Non negligent Manslaughter

Forcible Rape

Robbery

Aggravated Assault

Burglary

Larceny-theft

Motor Vehicle Theft

Arson

Simple Assault

Intimidation

Destruction, Damage, or Vandalism of Property

The definitions of these offenses for SRS purposes can be found in Appendix III.

5. Additional Instructions - The following additional instructions are applicable to agencies submitting Quarterly Reports:

## - Study 23544 -

a. Simple Assault and Intimidation - In the SRS, Simple Assault and Intimidation are not reported separately. Both are reported on the Return A-Monthly Return of Offenses Known to the Police form as Other Assaults-Simple, Not Aggravated. For the purpose of hate crime reporting, SRS agencies should report Simple Assault and Intimidation separately using the definitions found in Appendix III.

b. Destruction, Damage, or Vandalism of Property - In the SRS, Destruction, Damage, or Vandalism of Property are reported only when arrests occur. They are then reported on the appropriate Age, Sex, and Race of Persons Arrested form for persons either under 18 years of age or 18 years of age and over. Vandalism is reported on the forms as Vandalism, but Destruction of Property and Damage to Property may be reported as either Vandalism or All Other Offenses, depending on the facts of the case. However, all three should be reported on the hate crime reporting form as Destruction/Damage/Vandalism of Property regardless of whether arrests have taken place. The offense is defined in Appendix III.

c. Non applicability of the Hierarchy Rule - In the SRS under the Hierarchy Rule, only the most serious Part I offense in a multiple-offense incident is to be reported. However, for hate crime reporting purposes, all of the offenses listed in number 4 above which were identified as bias motivated and occurred during the incident should be reported on the hate crime reporting form.

d. Multiple-page Submission - Should it become necessary to submit multiple pages for one incident in order to list more than six (6) different offenses, the FBI's UCR Program will relate the pages by the common incident number and Page \_\_\_ of \_\_\_ designation.

e. UCR Offense and Code Segment - The number of victims involved in each offense code where bias/hate motivation has been determined should be listed.

In the event of multiple offense codes and victims, only those where bias/ hate motivation exists should be listed. Do not list an offense code and its victims when the motivation is clearly not bias motivated or when the motivation is unknown.

For example, a robbery occurred at a bar and its patrons were robbed by two offenders. During the robbery, a female Asian patron was raped by one of the offenders. Subsequent investigation reveals that while the robbery motive did not involve bias, the rape was bias motivated. Therefore, only the rape should be reported as a hate crime.

f. Updating - For updating purposes, a copy of the report should be retained by the agency. Corrections/updates should be accomplished by submitting a photocopy of the original form with changes shown and adjustment marked at the top or by sending a corrected Incident Report on either the disk or tape submission. Incidents can be deleted by simply identifying them on the Quarterly Summary Page.

### B. NIBRS Hate Crime Reporting

1. Who submits hate crime data in the NIBRS format? - Agencies participating in NIBRS which are able to include the hate crime data element in their magnetic tape submissions contribute their data in the NIBRS format.

2. How are the data transmitted? - The data element addressing Bias Motivation has been incorporated with the other NIBRS data which are all submitted on magnetic tape as an integral part of NIBRS participation. Quarterly Reports are not necessary for NIBRS participants.

3. Where should the hate crime data element be located on the magnetic tapes? - It should be entered at the end of the Offense Segment (Level 2).

- Study 23544 -

4. To which offenses does the hate crime data element apply? - The hate crime data element applies to all Group A offenses. They are listed below. (The numbers in parentheses are UCR Offense Codes.)

Arson (200)

Assault Offenses:

Aggravated Assault (13A)

Simple Assault (13B)

Intimidation (13C)

Stolen Property Offenses (280)

## - Study 23544 -

### Weapon Law Violations (520)

The definitions of these offenses for NIBRS purposes can be found in Appendix III.

5. What is the hate crime data element's number? - Data Element 8A: This data element should be used to flag offenses which were motivated by the offender's bias. Designated in NIBRS as Data Element 8A, it should be added as a Mandatory for each of the offenses of NIBRS Volumes 1: Data Collection Guidelines and Volume 4: Error Message Manual for which hate crime applies.

Bias Motivation - 2 Characters (A): This data element indicates whether the offender was motivated to commit the offense because of his/her bias against a race, religion, disability, sexual orientation, or ethnicity/national origin. Because of the difficulty of ascertaining the offender's subjective motivation, bias is to be reported only if investigation reveals sufficient objective facts to lead a reasonable and prudent person to conclude that the offender's actions were motivated, in whole or in part, by bias. The most appropriate of the following codes is to be entered into the data element:

#### Racial Bias:

- 11 = Anti-White
- 12 = Anti-Black
- 13 = Anti-American Indian/Alaskan Native
- 14 = Anti-Asian/Pacific Islander
- 15 = Anti-Multi-Racial Group

#### Religious Bias:

- 21 = Anti-Jewish
- 22 = Anti-Catholic
- 23 = Anti-Protestant
- 24 = Anti-Islamic (Moslem)
- 25 = Anti-Other Religion (Buddhism, Hinduism, Shintoism, etc.)
- 26 = Anti-Multi-Religious Group
- 27 = Anti-Atheist/Agnostic

#### Ethnicity/National Origin Bias:

- 32 = Anti-Hispanic
- 33 = Anti-Other Ethnicity/National Origin

#### Sexual-Orientation Bias:
